Explanation and Scope

§ 944.34 Priorities Regulation 13—(a) What this regulation does. This regulation covers special sales, which, in general, are sales of materials or products by persons who acquired or made them for use and not for sale or resale. This is

more fully explained in paragraph (b) (1). Special sales may be made freely, except for materials or products on List A (Domestic) or List B (Export), and certain sales as scrap. This is the only WPB regulation on special sales, and a seller who wants to make a special sale need not look at any other WPB regulation or order unless this regulation says he must. However, all buyers must comply with applicable WPB orders on use, inventory, resale, etc., as explained in paragraph (j).

(b) Definitions. As used in this regulation:

(1) "Special sale" means a sale of a material or product by any person (including a Government agency) who acquired or made it for use and not for sale or resale. All sales by trustees in bankruptcy, receivers and other kinds of liquidators (in the course of liquidation as distinct from continued operation of a business) are special sales even though neither they nor their beneficiaries bought for use. All sales at public auction by general auctioneers are special sales regardless of the purpose for which the material or product was acquired. All sales of surplus materials or products by Government agencies are special sales. Transfers of materials acquired or made for use, from one plant or operating unit to another which is owned by the same person but which normally buys separately, are special sales.

(2) "Material or product" means any commodity, equipment, accessory, part, assembly or product of any kind in finished, semi-finished or raw material form.

(3) A "used" material or product is one which has been put into actual use.

(4) "Persons buying for use" include, among others, a contractor who buys with intent to incorporate the material in a building or product for a third person.

(c) Sales not covered by this regulation. The following types of sales are not considered special sales and are not governed by this regulation, even though they may involve materials or products acquired or made for use:

(1) A sale of a material or product by a person regularly engaged in the business of selling it. He is governed, however, by all WPB orders and regulations which apply to his business and to the material or product he is selling.

(2) Sales of plant-generated scrap, meaning scrap which is generated in the course of manufacture or is the waste of industrial fabrication. Sales of other kinds of scrap are covered by paragraph (i).

(3) Sales of rationed products which are controlled by another Government Agency.

NOTE: The subject matter of the former paragraph (c) (3) of this regulation as it read before July 5, 1945, is now contained in section C. (4) (Special orders) in the introduction to List A. Hence, references in other WPB orders to paragraph (c) (3) of this regulation are considered references to the new section C. (4).

(4) Sales of foods for humans or animals, medicines, tobacco, oils and fats,

petroleum and petroleum products including natural and liquefied petroleum gases.

(5) Sales of steel, copper or aluminum in controlled material form (as defined in CMP Regulation 1) acquired or produced by a controlled material producer for the purpose of further conversion into other controlled material forms.

(6) A sale of an entire business which is transferred as a going concern to a new owner who continues to operate it in the same or substantially the same form.

(7) A sale made by a utility producer under Order U-1 or a petroleum operator under Order P-98-c.

General Rules for All Special Sales

(d) Most special sales may be made freely; general rules. A seller may make a special sale of most materials or products freely to anyone without WPB authorization and without requiring the buyer to apply or extend a preference rating. The only exceptions are special sales of materials or products on List A (domestic sales) and on List B (export), and certain sales as scrap, as explained in paragraphs (g), (h) and (i). In addition, all sellers are subject to the following general rules and conditions:

(1) If the seller knows that a person who wants to buy the material or product will use it for a prohibited purpose or would have more of it than he is permitted to have, the sale may not be made. The buyers' obligations are stated in paragraph (j).

(2) At special sales, preference ratings have no effect by way of obliging a holder to sell. However, if he sells at all, and the buyer properly gives a rating, the seller must honor it to the extent required by Priorities Regulation 1. For example, if two or more bidders at a public auction offer the same terms for any lot of materials or products, the seller must prefer the bidder who supplies the highest preference rating. Regardless of whether the sale is at auction, a holder need not give preference to a higher rated purchaser if a lower rated or unrated purchaser offers better terms which are not in violation of applicable OPA regulations.

(3) If a person sells a material or product under this regulation to someone who gives him a preference rating or a CMP allotment symbol or number, the seller cannot use this rating or allotment to replace the material or product he has sold. The effect of this rating or symbol or number stops when the seller receives it.

(4) If the sale relates to surplus Government-owned or Government-involved materials or products (including contractor inventories and sales by owning or disposal agencies), the seller may be subject to regulations of the Surplus Property Board.

(e) Use of material acquired with priorities assistance. This regulation does not change the general rule of § 944.11 of Priorities Regulation 1 that material acquired with priorities assistance must, if possible, be used for the purpose for which the assistance was given. Where such material cannot be used for this

purpose, then this regulation applies if a special sale is made.

(f) *Sales through an agent.* Where a person sells through an agent, except at public auction sales, the sale is a special sale only if it would be a special sale if made directly by the principal. If it is a special sale, the restrictions of this regulation apply to the principal and also to his agent if the latter knows or has reason to know the facts. In cases of special sales made at public auctions, the restrictions of this regulation are applicable both to the auctioneer and to his principal.

NOTE: The subject matter of the former paragraph (f) of this regulation as it read before July 5, 1945, is now contained in paragraph (j) (Provisions relating to buyers). Hence, references in other WPB orders to paragraph (f) of this regulation are considered references to the new paragraph (j).

Restricted Special Sales

(g) *Materials or products on List A.* A special sale of a material or product on List A attached to this regulation, other than a sale for export, may be made only under the conditions described in the list.

(h) *Materials or products on List B (export).* A special sale of a material or product on List B to a foreign purchaser or to a domestic purchaser who is buying for export or for resale to a foreign purchaser may be made only under the conditions described in the list. Used materials or used products, however, may be sold freely for export unless a notation on List B indicates a restriction on the sale in their used condition. Also, if an exporter, other than a controlled material distributor or warehouse, is unable to export material purchased for export, he may make a special sale of it in the domestic market under the rules of this regulation. Nothing in this regulation relieves any exporter from complying with all applicable regulations of the Foreign Economic Administration or other Government agencies who may have jurisdiction over exports.

(i) *Sales as scrap of materials or products other than plant-generated scrap.*

(1) Any material or product (other than those listed below and plant-generated scrap) may be sold as scrap in a special sale if it is obsolete, unusable or not readily-salable and will be used or consumed principally as scrap although some part of it may possibly be salvaged by the scrap buyer. A person may make such a special sale as scrap without stripping, disassembling or breaking up the material or product before sale. The sale may be made either to any consumer of scrap to be used only as scrap, or to any person regularly engaged in the collection, disassembling, sorting, and disposal of that kind of scrap material, primarily for remelt or other scrap use. Subsequent sales of any salvaged materials or products by such a scrap dealer are not covered by this regulation, but are subject to any WPB orders or regulations which apply to the distribution of the particular material or product. The above does not apply to the following materials and products:

Used tin cans sold as scrap are governed by Order M-325.

Domestic mechanical refrigerators (new) may be sold as scrap only on specific WPB authorization. Apply on Form WPB-869.

(2) If the buyer by contract, warranty or otherwise has stated that the particular material or product being sold as scrap will be used or disposed of as scrap, this regulation does not relieve the buyer from compliance with that condition.

(3) The sale at low prices, even as low as scrap prices, of prime or off-grade materials or products for use or resale "as is" does not constitute a sale as scrap and such sales may not be made under this paragraph. Instead such a sale is subject to all the other rules of this regulation which apply to special sales of the particular materials or products.

(4) This paragraph permits special sales as scrap only for use or resale within the 48 States and the District of Columbia.

Provisions Relating to Buyers

(j) *Provisions relating to buyers—(1) Use and quantity restrictions still apply.* The buyer at a special sale may not violate any WPB order or regulation controlling the amount of any material or product he may make or the use or disposition that he may make of it. He must also comply with any applicable order which limits the amount of any material or product he may buy (in terms of a specified quantity or quota, as distinguished from a provision requiring WPB permission for all purchases. The latter type of provision does not apply when a special sale is made unless required by this regulation). All the prohibitions in WPB orders or regulations against the use of materials or products for particular purposes remain in effect, and even though a special sale may not be restricted by this regulation, the buyer may have to get permission to use under the applicable order.

(2) *Inventories.* A person buying for use may accept delivery of any item of a material or product bought on a special sale under this regulation if his total inventory of that item is or will be virtue of accepting such delivery be not in excess of his succeeding six months' requirements. This permits a person to exceed applicable inventory limits only if he acquires the excess under this regulation. However, if thereafter he places orders for deliveries of the particular item from producers or distributors, he may not receive such further deliveries until his inventory is reduced to a practicable minimum working inventory or other applicable limit, and such orders may not call for delivery before that time. This paragraph does not apply to persons buying for resale. It also does not permit a person to stockpile in anticipation of starting or resuming civilian production except as permitted by other applicable regulations or orders. However, if any applicable WPB order or regulation permits a larger inventory than six months, this paragraph does not restrict receipts below the larger amount.

(3) *Persons buying for resale.* If a person at a special sale buys a material or product for resale, he may not resell in violation of any WPB regulation or order which applies to persons engaged in the business of selling the particular material or product. Even if the buyer for resale has not previously sold the material or product as part of his regular business, he is subject to the same restrictions in reselling as a regular wholesaler, retailer or other distributor of it under all applicable WPB regulations and orders, unless the particular regulation or order specifically states otherwise. For example, if an order requires specific WPB permission before a regular distributor of a product can sell it, any person who buys it at a special sale for resale must do what the order says.

(4) *Reports.* If any order or regulation provides that a buyer of a material or product must make any report or furnish any information either to the War Production Board or to the seller, this regulation does not excuse him from these requirements.

Miscellaneous Provisions

(k) *Records.* Any person making a sale under this regulation must keep sufficient records so that he can show that the sale was permitted under this regulation.

(l) *Revisions of Lists A and B.* Lists A and B attached to this regulation will be revised from time to time. A person wishing to sell a material or product under this regulation should be sure that he has the lists which are in effect at the time of the sale. Copies may be obtained from any field office of the WPB.

(m) *Letters and questions.* Any letters or questions about this regulation should be sent to the War Production Board in Washington 25, D. C., marked "Ref: P.R. 13".

Issued this 22d day of August 1945.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

LIST A—RESTRICTIONS ON SPECIAL SALES FOR DOMESTIC

A. *General rules.* Special sales in the domestic market of materials or products in Column 1 of List A below are restricted to certain classes of buyers as indicated below in section B, and in accordance with any special rules for a particular material or product as shown on the list. The listings show in some instances the class or group of materials and do not always list all the trade names and related materials. Exceptions to the restrictions are indicated below in section C. Special sales of materials or products not listed may be made freely, but all special sales are subject to the general rules in paragraphs (d), (e) and (f) of the regulation.

B. *Classes of buyers.* Special sales of materials or products on this List A may be made to the following classes of buyers:

(1) To a producer of the same kind of material or product.

(2) To a reprocessor, unless a note in Column 4 of the list indicates to the contrary with respect to a particular material or product. A reprocessor means any person who remakes, repairs or reworks new, rejected or second-grade materials or products of the kind being sold.

(3) To a regular dealer, unless Column 3 or a note in Column 4 of the list indicates to the contrary with respect to a particular material or product. A dealer means any wholesaler or retailer regularly dealing in the materials or products of the kind being sold, and reselling them from stock or inventory to industrial users or to other persons. It also includes persons who recondition or rebuild equipment and machinery of the kind being sold for resale to industrial users. Such persons are not, however, relieved from compliance with any WPB orders or regulations which control the distribution of the material by them.

If this List A shows no restrictions on the special sale of a material or product to a regular dealer, the seller may sell it to any person for resale who gives him the following certification, provided the seller has no reason to believe that it is false.

The undersigned buyer certifies under Priorities Regulation 13 to the seller and to the WPB that he will in good faith offer for sale the material or product covered by this order in substantially the same time and manner as would a person regularly dealing in it, that he will render substantially the same type of service as would such a person, and that he will comply with all WPB regulations and orders applicable to such a person.

(Signature)

Any person giving such a certification must comply with all applicable WPB regulations and orders as he has certified he will. The standard certification provided in Priorities Regulation 7 may not be used in place of this certification.

(4) To persons buying for use subject to the restrictions indicated in Columns 2 and 4 of the list.

C. Exceptions from the restrictions on the list. Even if this List A shows a restriction on the special sale of a particular material or product, the sale may still be made if one or more of the following conditions apply:

(1) *Special permission.* If the list requires special authorization from the WPB in order for a sale of a particular material or product to be made, or if other conditions im-

posed by the list cannot be met, the seller may apply on Form WPB-1161 for special permission to sell unless the list states that some other form must be used. If Form WPB-1161 is applicable, and permission is given, it may be restricted to a specific buyer or class of buyers, or may permit the sale to any buyer for resale who gives the certification described in section B (3) above relating to dealers.

(2) *Used materials or products.* If the material or product is used, it may be sold freely to anyone unless a notation on List A indicates a restriction on its sale.

(3) *Small quantity exemption.* A special sale may be made freely if all the material or product of the same kind or type that the seller has at any one plant, operating unit or location did not cost him more than \$100. In the case of any materials or products involved in a Government contract termination, this exemption applies if there is no more than \$100 worth of the material or product in the termination inventory at any one location. Similarly, \$100 worth (at cost) of any material or product may be sold at any single public auction, regardless of the amount of the material or product the seller has. Also, for the purpose of determining whether a particular lot of material or product is suitable for the prospective customer's use, a person may make a special sale of a sample lot, provided the amount involved (at cost to the seller) of any such sample does not exceed \$20.

(4) *Special orders.* If the War Production Board by an order or in any other way has ruled that all persons engaged in a particular business may sell or exchange the materials or products between themselves, they may do so.

(5) *Disposal of contract termination inventories.* For the purpose of making a settlement of a Government contract, surplus materials or products on List A may be transferred freely from any subcontractor or prime contractor to a procuring agency or disposal agency of the Government, providing the procuring agency has so directed. However, if any material or product is later withdrawn from the contract settlement, its disposition is controlled by this List A.

(6) *Sales to Government stockpiling agencies.* A person may sell surplus materials or

products on List A freely to one of the following Government Corporations or to anyone buying as agent for one of them: Commodity Credit Corporation, Defense Supplies Corporation, Metals Reserve or Rubber Reserve Company.

(7) *Transfers of surplus Government-owned materials or products.* Transfers by Government agencies of surplus materials or products, or of idle or excess materials or products not acquired for sale or resale, may be made freely to a Government Disposal Agency acting as such and may be made freely between and within the War Department, Navy Department, Maritime Commission, War Shipping Administration, Veterans' Administration, and the Defense Plant Corporation, and from the Government Disposal Agencies to any of the above.

D. *Buyers obligations.* No matter who the buyer is or how the sale is made or authorized, the buyer is always subject to the conditions and other provisions stated in paragraph (j) of the regulation.

LIST A—RESTRICTIONS ON SPECIAL SALES (DOMESTIC)

EXPLANATION OF TERMS USED

"WPB-1161" (or other designated WPB form number) means that the seller may not sell to the class of buyer listed at the head of the column without special WPB permission pursuant to application on the form specified. A note in the Remarks Column may show limited exceptions to this requirement. Section C (1) in the introduction to this list tells how to get permission.

"PR" followed by a letter and number, like "PR-AA5" means that the seller may sell only to a person in the particular class of buyer who extends to him an AA-5 or higher preference rating. These ratings cannot be used further by the seller, as explained in paragraph (d) (3) of the regulation. This regulation does not in any way assign preference ratings.

"WOP" means that the seller can sell to the class of buyer listed at the head of the column without any preference rating, allocation, allotment or other special permission being necessary.

Provisions in the Remarks Column applicable to the particular material or product must be complied with.

SALES OF SURPLUS PROPERTY TO GOVERNMENT AGENCIES AND STATE OR LOCAL GOVERNMENTS

(a) Purpose. Government agencies and state or local governments are entitled to certain priorities in getting surplus property from government disposal agencies under the

(1) In the case of orders for any item received during the first 30 days following notice of availability under Surplus Property Board Regulation No. 2, preference may be given, to the extent indicated in that regula-

tion, to government agencies or state or local governments ahead of other purchasers placing orders bearing the same rating.

(2) In addition, to the extent indicated in that regulation, the filling of rated orders received during the above 30-day period may be postponed within the period, and the sequence in which a disposal agency received rated orders bearing the same rating during the period may be disregarded. (Issued May 16, 1945.)

PART 3290—TEXTILE, CLOTHING AND
LEATHER

[General Preference Order M-388C, as
Amended Aug. 23, 1945]

WOOL AND WOOL TEXTILES FOR CIVILIAN
ITEMS

§ 3290.354 *General Preference Order M-388C*—(a) *Explanation*. This order is supplemental to M-388. It states the special rules applicable to civilian items made from wool materials and lists the items for which ratings are assigned.

(b) *Delivery quotas*—(1) *General rule*. (Orders rated AA-3 or higher, or AA-5, must be filled as required by Priorities Regulation 1, in addition to the quotas

under this paragraph.) Every producer and importer of wool fabrics must deliver to fill AA-4 orders in the period from May 1, 1945, through June 30, 1945, inclusive, and in each subsequent calendar quarter, at least 80 percent of his total deliveries of wool fabrics (by linear yards) during the same period on both AA-4 and unrated orders. Stated another way, he must not deliver on unrated orders in any of these periods more than 20 yards of wool fabrics for each 80 yards he delivers to fill AA-4 orders in the same period. He must not discriminate against rated orders in distributing fabric widths as between rated and unrated deliveries.

(2) *Exception for 6 percent of total deliveries*. An exception to the above rule is that each producer or importer may deliver up to 6 percent of his total deliveries in the period without regard to AA-4 ratings, as long as he fills all other rated orders and complies with all other applicable orders, regulations and directions of the War Production Board.

(3) *Examples*. If a woolen mill delivers a total of 1,000,000 yards in a calendar quarter, and half of this yardage is delivered to fill orders rated AA-3 or higher, or AA-5, it has available a total of 500,000 yards of both AA-4 and unrated deliveries. Eighty percent of this total, or at least 400,000 yards, would have to be delivered on AA-4 orders, and not more than 20 percent or 100,000 yards could be delivered on unrated orders. However, if the mill delivers in the period 750,000 yards on orders rated AA-3 or higher, or AA-5, leaving 250,000 yards for unrated and AA-4 orders, he may still deliver 60,000 yards on unrated orders to the extent that these 60,000 yards are not needed to fill orders other than AA-4 or to comply with regulations, orders or directions of the War Production Board.

(4) *Rejects*. Rejects, including remnants over one yard and seconds, must be included in calculating required deliveries for rated delivery quotas under this order.

(5) *Military and other cancellations*. Material resulting from cancellations of customers' orders must also be included in calculating rated delivery quotas. However, unless otherwise ordered by the War Production Board, a producer or importer who has a contract or subcontract with the U. S. Army, Navy, Maritime Commission, War Shipping Administration or the Procurement Division of the Treasury Department which is cancelled after April 30, 1945 and for which wool fabric, wool yarn or wool is already completed or in process either in his plant or that of one of his subcontractors may deliver the completed fabric, or the fabric made from the material in process free of his rated delivery quota.

(c) *Dyeing and finishing of fabrics*. A producer of wool fabrics or importer shall dye wool fabrics which he produces or imports after May 1, 1945, only to fill accepted rated orders, or orders which are authorized under paragraph (g) of M-388, or unrated orders within the limits allowed by this order. Material must not be finished in a manner which will make it unsuitable to fill the required amounts of rated orders.

(d) *Preference rating schedules*. Preference ratings are assigned in the preference rating schedules of this order. The conditions under which the ratings can be used are explained in these schedules.

Issued this 23d day of August 1945.

Recording Secretary.

AA-4 PREFERENCE RATING SCHEDULE I—WOOL
CIVILIAN ITEMS

Assignment of AA-4 rating to manufacturers of listed wool apparel and other items. Preference rating AA-4 for wool fabric is assigned to manufacturers of the items shown in this schedule who qualify under M-388 and M-388C and comply with the following:

(1) This rating may be used only to get the fabric shown in the Fabric Column for the particular item and may be extended for wool material to be incorporated in the fabric, as permitted by Priorities Regulation 3.

(2) The fabric must be incorporated into an item produced for sale by the manufacturer at or below the lower of the following two prices: (i) the price at which the manufacturer is permitted to sell the item under regulations of the Office of Price Administration, or (ii) the price specified in the Maximum Price Column.

(3) The Rated Quota Column in this schedule shows for each item a quota of units of the item. This quota is a percentage of the total number of units (in all prices lines) of the same item which the manufacturer made in the corresponding quarter of 1943. He may not get more fabric with the rating in any calendar quarter than the yardage necessary to fill this quota. This is the yardage which he must show in Form WPB-4200 before using the rating, as explained in paragraph (i) (2) of M-388.

(4) The rated quotas shown below, as amended August 23, 1945, supersede the previous rated quotas of this schedule for deliveries in the third quarter of 1945. AA-4 ratings previously accepted by a supplier for delivery in that quarter within the previous quotas, to the extent permitted by Direction 3 to M-388 remain valid, but the yardage covered by such ratings must be charged to the rated quotas shown below.

(5) A manufacturer who has filed Form WPB-4200 in accordance with paragraph (i) of Order M-388 for any item with a rated quota which was increased by the amendment of M-388C on August 23, 1945, may use the increased rated quota without filing a new Form WPB-4200.

(6) A manufacturer who has received an authorization on Form WPB-4201 for any item listed in this paragraph may use the AA-4 rating to get an increased yardage in the third quarter of 1945 for that item to the extent stated, without filing a new application:

(i) For items C-13 and C-27 he may use the rating for the yardage authorized on Form WPB-4201, plus $\frac{1}{2}$ of that amount.

(ii) For items C-1, C-7, C-10, and C-34 he may use the rating for the yardage authorized on Form WPB-4201, plus $\frac{5}{7}$ ths of that amount.

(iii) For items C-13, C-17, C-19, and C-30 he may use the rating for the yardage authorized on Form WPB-4201, plus $\frac{7}{8}$ ths of that amount.

Definitions. (1) "Producer" means any
individual, partnership, association, cor-

poration, governmental corporation or
agency, or any organized group of per-
sons, whether incorporated or not, lo-
cated in the United States, its territories,
or possessions, supplying, or having fa-
cilities built for supplying, directly or
indirectly for general use by the public,
one or more of the following services:

- (i) Electric power,
 - (ii) Gas, natural or manufactured, ex-
clusive of the production and transmis-
sion of natural gas up to the point of its
entry into gas transmission lines from
field gathering lines,
 - (iii) Water, other than exclusively for
irrigation purposes,
 - (iv) Central steam heating, or
 - (v) Any of the foregoing services but
not for general use by the public, if a
specific direction from the War Produc-
tion Board entitles such person or agency
to apply the ratings herein assigned.
- Application for such a specific direction
should be made by letter to the War
Production Board, Washington 25, D. C.,
Ref.: U-1.

(2) "Material" means any commodity,
equipment, accessory, part, assembly or
product of any kind.

(3) "Controlled materials" means con-
trolled materials as defined in Schedule
I of CMP Regulation 1.

(4) "Maintenance" means the upkeep
of a producer's property and equipment
in sound working condition. It does not
include any plant addition.

(5) "Repair" means the restoration of
a producer's property and equipment to
sound working condition after wear and
tear, damage, destruction of parts, or the
like have made such property or equip-
ment unfit or unsafe for service. It
does not include any plant addition.

(6) "Plant addition" means the con-
struction or installation of new facilities
or the replacement of existing facilities
with facilities of greater capacity.

(7) "Minor plant addition" means a
plant addition having a net material
cost of not more than \$25,000. No job or
project may be subdivided to come with-
in this limit.

(8) "Major plant addition" means a
plant addition having a net material cost
of more than \$25,000.

(9) "Net material cost" means the cost
of material incorporated in plant less the
cost of material removed from plant,
priced in accordance with the producer's
regular accounting practice.

(10) "Operating supplies" means ma-
terial, other than fuel, which is used or
consumed in the course of a producer's
operations, except in maintenance, re-
pair, and plant additions.

(11) "Inventory" means all material
in the producer's possession, without re-
gard to its accounting classification, ex-
cluding, however, (i) material incorpo-
rated in plant, (ii) appliances and mer-
chandising supplies, (iii) fuel, (iv) water
purification and treatment material ex-
cept equipment, (v) gas chemical ma-
terial, (vi) material segregated for use in
major plant additions, (vii) scrap and
(viii) war surplus materials purchased.

(12) "Class" means any one of those
categories of material established as a
basis for classification of inventory in
Schedule A of this order.

(13) "War surplus materials" means
material designated as surplus to the war
effort and offered for sale by any Federal
government agency having jurisdiction
over their disposal.

How To Obtain Material

(b) *Preference ratings.* (1) A pref-
erence rating of AA-1 is hereby as-
signed to orders to be placed by a pro-
ducer for material (other than controlled
materials), for use in maintenance and
repair, as operating supplies, and for
minor plant additions for which the net
material cost is not more than \$10,000,
in every class except (i) the transmission
and distribution class and (ii) the meter
class.

(2) A preference rating of AA-1 is
hereby assigned to orders to be placed by
a producer for material (other than con-
trolled materials), for use in the repair
of an actual or imminent breakdown, in
(i) the transmission and distribution
class and (ii) the meter class.

(3) A preference rating of AA-3 is
hereby assigned to orders to be placed by
a producer for material (other than con-
trolled materials), for use in mainte-
nance and repair, as operating supplies,
and for minor plant additions, except
where an AA-1 rating is assigned in para-
graphs (b) (1) and (b) (2) above.

(4) Material obtained with the AA-1
rating may be used for purposes which
are assigned lower ratings, but it may be
replaced in inventory only by applying
the lower rating to an equivalent dollar
value of material in the same class. Ma-
terial obtained with the AA-3 rating may
be used for purposes which are assigned
the AA-1 rating and may be replaced in
inventory with either the AA-1 rating or
an authorized AA-3 rating. The provi-
sions of this paragraph (b) (4) supersede
those of § 944.11, paragraph (a), of Prior-
ities Regulation 1.

(5) Material in inventory in excess
of a practical working minimum may
be used for purposes for which no pref-
erence rating is assigned, but may not
be replaced in inventory with the use of
a preference rating.

(6) The preference ratings herein as-
signed may not be used to obtain ma-
terial for major plant additions.

(7) [Deleted Aug. 23, 1945.]

(8) The preference ratings assigned
by this Order U-1 are ineffective with re-
spect to materials scheduled for delivery
after September 30, 1945.

(c) *CMP allotment symbol.* (1) The
CMP allotment symbol U-9 is hereby
assigned to orders to be placed by a pro-
ducer for controlled materials for use in
maintenance and repair, as operating
supplies and for minor plant additions.

(2) An order for controlled materials
for use in maintenance and repair, as
operating supplies, and for minor plant
additions bearing the CMP allotment
symbol U-9 and the certification re-
quired by paragraph (d) of this order
shall be deemed an authorized controlled
materials order. This CMP allotment
symbol shall constitute an "allotment

number or symbol" for the purpose of CMP Regulation 3.

(3) Controlled materials in inventory in excess of a practical working minimum may be used for purposes for which no CMP allotment symbol is assigned, but may not be replaced in inventory with the use of a CMP allotment symbol.

(4) The CMP allotment symbol herein assigned may not be used to obtain material for major plant additions.

(5) The CMP allotment symbol U-9 assigned by this Order U-1 is ineffective with respect to materials scheduled for delivery after September 30, 1945.

(d) *Certification.* The ratings assigned by subparagraphs (b) (1), (2) and (3) of this order and the CMP allotment symbol U-9 may be applied by a producer only by the use of a certification in substantially the following form unless an order of the War Production Board affecting a particular item of material requires some other form of certification:

Preference Rating -----, CMP Allotment symbol U-9. The undersigned producer certifies subject to the penalties of section 35 (A) of the United States Criminal Code, to the seller and to the War Production Board, that, to the best of his knowledge and belief, the undersigned is authorized under applicable War Production Board regulations or orders to place this delivery order, to receive, for utility uses under Utilities Order U-1, the material ordered, and to use the preference ratings or CMP allotment symbol which the undersigned has placed on this order.

The certifications set forth in Priorities Regulation 3 and CMP Regulations 1 and 5 may not be used but the standard form of certification provided in Priorities Regulation 7 is permissible if the producer adds a statement saying that material ordered is for utility uses under Utilities Order U-1. No certification may be used on orders placed without a preference rating or CMP allotment symbol.

Restrictions on Ordering Material

(e) *Scheduling deliveries.* (1) Except as permitted by paragraphs (f) and (g) below, no producer shall schedule for delivery to it any material to be used for maintenance and repair, as operating supplies, or for minor plant additions, unless the following condition is satisfied:

(1) The producer does not have reason to believe that its inventory of material in the same class is or will, by virtue of its acceptance of the delivery when made, become in excess of a practical working minimum. A practical working minimum inventory is that amount of material which a producer, exercising prudent operating judgment, considers the smallest quantity of material it can hold and render service in accordance with sound and economical operating standards. It may be less than the values established in Schedule C but it shall in no case exceed them.

(2) Material required for major plant additions may not be acquired or scheduled for delivery in greater quantities or on dates earlier than required for the installation.

(3) No producer may place an order for any item of material, including material for major plant additions, if the required item or a practical substitute therefor is in the producer's inventory in excess of minimum requirements for that item.

(f) *Exceptions to paragraph (e).* (1) The restrictions of paragraph (e) (1) do not apply to a producer so long as its inventory does not exceed \$25,000 in value, except that such a producer must restrict its inventory to that amount of material which in the exercise of prudent operating judgment, it considers the smallest quantity it can hold and render service in accordance with sound and economical operating standards. Each purchase of material by such a producer, however, must be treated as the purchase of a "short item", and is subject to the provisions of paragraph (g) below. A producer engaged in furnishing more than one of the services named in paragraph (a) (1) may consider its inventory for each service separately for the purposes of this paragraph.

(2) The restrictions of paragraph (e) do not apply to material excepted from inventory by the definition in paragraph (a) (11).

(3) The War Production Board may from time to time establish specific limits for permissible inventory for individual producers, modifying the provisions of Schedule C.

(4) Notwithstanding the restrictions of paragraph (e) or of paragraph (g) below a producer may schedule an item of material for delivery in a minimum procurable commercial quantity, and in the case of cast iron, carbon steel, and non-metallic pipe, may schedule for delivery a carload quantity.

(g) *Short item deliveries.* Even though it cannot schedule deliveries without exceeding the limits of paragraph (e) (1), a producer may schedule for delivery material which it will require for use in maintenance and repair, as operating supplies and for minor plant additions during the ninety-day period following the date it expects to receive such material, so long as the producer's inventory of the required material, including material segregated for use in major plant additions, together with material already scheduled for delivery, will be insufficient to meet requirements during such a ninety days period.

Restrictions on Use of Material

(h) [Deleted Aug. 23, 1945.]

(i) [Deleted Aug. 23, 1945.]

(j) [Deleted Aug. 23, 1945.]

Selling Material

(k) *Sales of material.* A producer may sell material which is in its inventory or which it acquired for major plant additions to any person. However, the preference ratings or allotment symbol assigned by this order may not be used to replace in inventory material sold by a producer unless the sale is to (1) another producer, or (2) a customer of a producer for the repair of the customer's facilities, or (3) a contractor for the installation of facilities for a customer of

the producer under Direction 5 to Order U-1. Producers may sell material pursuant to this paragraph (k) or in accordance with the provisions of PR-13.

(l) [Deleted May 12, 1945.]

Inventory Redistribution

(m) [Deleted Aug. 31, 1944.]

General Provisions

(n) *Appeals and use of Form WPB-2774.* Appeals from the restrictions of this order may be filed by letter with the Office of War Utilities, War Production Board, Washington 25, D. C., Ref.: U-1, stating fully the grounds for the appeal and the relief requested. If, however, the appeal involves an uprating or other special assistance to obtain material urgently required for maintenance or repair, or is for priorities assistance to obtain material for a major plant addition, the appeal should be filed on Form WPB-2774.

(o) *Records.* In addition to the records required to be kept under Priorities Regulation 1, each producer who applies the preference ratings or allotment number hereby assigned shall maintain a continuing record of inventory and of segregated material in his possession.

(p) *Communications to War Production Board.* All reports required to be filed hereunder and all communications concerning this order, shall, unless otherwise directed, be addressed to: Office of War Utilities, War Production Board, Washington 25, D. C., Ref.: U-1.

(q) *Violations.* Any person who willfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priorities control and may be deprived of priorities assistance.

(r) *Applicability of WPB regulations.* This order and all transactions affected hereby are subject to all applicable regulations of the War Production Board, as amended from time to time, unless there is a conflict between this order and such regulations, in which case this order shall govern, if it specifically so provides. No producer is, however, subject to the restrictions of CMP Regulation 5 nor may any producer in any way use the preference ratings therein assigned.

(s) *Special inventory directions.* Nothing in this order is intended to supersede any special inventory base established by a specific direction from the War Production Board to a named producer. All such directions shall remain in effect unless modified by a further specific direction to the producer affected.

(t) *Special provisions.* (1) With respect to WPB-2774 authorizations issued prior to August 23, 1945 and involving net in excess of \$25,000 net material cost, producers may use the preference ratings and CMP allotment symbol as-

signed in paragraphs (b) and (c) of this order in lieu of those specifically assigned on such a Form WPB-2774 authorization.

(2) Any specific denials or prohibitions related to the installation of plant additions by a named producer, issued by the War Production Board prior to August 23, 1945, are hereby revoked.

(u) Expiration date. This order expires September 30, 1945 unless sooner revoked.

Issued this 23d day of August 1945.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

Schedule C.

§ 4501.1 Utilities Order U-2—

(a) Definitions. (1) "Operator" means any individual, partnership, association, business trust, corporation, receiver, or any form of enterprise whatsoever,

whether incorporated or not, the United States, the District of Columbia, any state or territory of the United States, any political, corporate, administrative or other division or agency thereof, to the extent engaged in rendering telephone communication service within, to, or from the United States, its territories or possessions.

(2) "Schedule A service" means service to the extent required for the proper discharge of duties in the direct defense, public health, welfare and security categories listed on Schedule A attached.

(3) "Merchant Marine" has the same meaning as in Section I of Public Law numbered 87, Seventy-Eighth Congress, approved June 23, 1943.

(b) *Availability of facilities for essential uses.* (1) Operators shall disconnect service when they learn that the present real user of service is not a user contemplated in the service agreement. Any such disconnections shall be considered "normal disconnections" within the meaning of paragraph (b) (2) below.

(2) Exchange line plant, exchange central office equipment, or telephone sets made available through normal disconnection or by new acquisition shall be used to take care of applications for service in the following order:

(i) Schedule A service, public pay station service and service specifically authorized by the War Production Board because of essentiality or unreasonable hardship.

(ii) Changes of address of business service within the same exchange or to another exchange of the same operator within the same metropolitan area or within such other area as is defined by the operator's established practices.

(iii) New business service for an enterprise which the operator finds is substantially owned and principally operated or managed by a veteran who applies for service within twelve months after being honorably separated or placed on terminal leave from the armed forces of the United States or the merchant marine provided such enterprise is expected to be the veteran's principal means of livelihood. The applicant for service must certify to these facts in substantially the form set forth in the Certification Form (WPBI-2545).

(iv) New business service.

(v) Changes of address of residence service within the same exchange or to another exchange of the same operator within the same metropolitan area or within such other area as is defined by the operator's established practices.

(vi) Additions to existing business service.

(vii) New residence service set forth in Schedule B.

(viii) New residence service set forth in Schedule C.

(ix) New residence service other than that included in categories (i), (vii) and (viii).

(x) Where the operator finds that immediate installation of service is essential to the protection of life, such installation may be made as an exception to the order provided in the above categories. Such service shall, however, be disconnected promptly at the termina-

tion of the emergency and the facilities used to take care of applications as otherwise specified above.

(3) Idle facilities may be reserved to the extent operators find necessary to meet promptly the known or fairly anticipated requirements for Schedule A service and to provide for essential public pay station service.

(4) To the extent necessary to meet minimum needs for Schedule A service and for essential public pay station service, operators shall make available additional exchange central office equipment or exchange line plant by regrading any service under the following provisions:

(i) Regrading is to be done only when current installations of central office equipment permit. Regrading of Schedule A service and of business service is to be done only if regraded service meets minimum service needs.

(ii) Residence service shall be regraded before business service. Any regrading shall be in the reverse order of the dates of connection at the existing locations, that is, the most recent shall be regraded first.

(5) Subject to the provisions of (b) (4) (i) and (b) (4) (ii) above, operators shall regrade existing service to the extent necessary to provide service authorized by the War Production Board because of essentiality or unreasonable hardship.

(c) *Limitations on additional telephones.* (1) Residence extension service. Operators shall not install or reconnect residence extension telephones, residence extension bells, except loud ringing bells, or residence P. B. X. telephones, nor as a substitute provide additional main lines or stations on party lines. This provision has the following exclusions and exceptions:

(i) Temporary installations of one residence extension may be made when the operator finds it essential in cases of serious illness.

(ii) For practicing physicians and surgeons, the operator may install one extension telephone to meet professional requirements. The operator may also provide a connection with an answering bureau.

(iii) The installation and reconnection in residence quarters of telephones connected to private branch exchanges serving hotels, apartment houses, etc., may be made to the extent that no more than one such telephone may be provided in any residence quarters.

(d) [Deleted Aug. 23, 1945.]

(e) [Deleted Aug. 23, 1945.]

(f) [Deleted Aug. 23, 1945.]

(g) [Deleted Aug. 23, 1945.]

(h) *Reports.* All operators affected by this order shall execute and file with the Office of War Utilities such reports as the Director, Office of War Utilities, shall from time to time require; subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(i) *Appeals and applications.* Applications for relief under this order or appeals should be filed on Form WPB-2117.

(j) *Violations.* Any person who wilfully violates any provision of the order or who, in connection with this order wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control, and may be deprived of priorities assistance.

§ 4501.6 *Utilities Order U-3*—(a) *Definitions.* For the purpose of this order:

(1) "Operator" means any individual, partnership, association, business trust, corporation, receiver, or any form of enterprise whatsoever, whether incorporated or not, the United States, the District of Columbia, any state or territory of the United States, any political, corporate, administrative, or other division or agency thereof, to the extent engaged in rendering telephone communication service to the public (and such telegraph and teletypewriter service as may also be conducted by him) within, to, or from the United States, its territories, or possessions. Public law enforcement agencies and public fire protection agencies are excluded from this definition for the purpose of this order.

"Operator" also includes any persons operating a rural cooperative or mutually-owned telephone system. It further includes persons owning either a telephone or a telephone system which is connected to a telephone system rendering service to the public, so long as they do not generally use an MRO order other than Order U-3. Those who generally use another MRO order for their business operations, as, for example, railroads using Order P-142 or a manufacturer using CMP Reg. 5, are excluded from this definition.

(2) "Material" means any commodity, equipment, accessory, part, assembly or product of any kind.

(3) Without regard to accounting practices:

(i) "Maintenance" means the minimum upkeep necessary to continue a facility in sound working condition.

(ii) "Repair" means the restoration of a facility to sound working condition when the same has been rendered unsafe or unfit for service by wear and tear, damage, failure of parts or the like.

(4) "Operating supplies" means any material essential to the operator's business and used for purposes other than maintenance and repair.

(5) Without regard to accounting practices, "Operator's inventory" means the aggregate of material currently owned by an operator and not incorporated into plant or in the process of being consumed, exclusive of:

(i) At the operator's option, the dollar value of material offered for sale and listed by categories in column (b) of Form WPB-1127 for the third quarter of 1944.

(ii) Material for use on a project approved by the War Production Board on Form WPB-2774 or any alternative form, or segregated for use on construction jobs permitted by this Order.

(iii) Poles, crossarms, insulators and non-metallic conduit, furniture and fixtures; office machinery; printing, stationery and office supplies; house service

supplies; and coal and petroleum products.

(b) *CMP allotment symbol and preference ratings.* (1) An operator is authorized to use the CMP allotment symbol U-9 and is assigned the preference rating of AA-1 for deliveries of material for maintenance, repair and operating supplies, except for:

- (i) Telephone sets;
- (ii) [Deleted Aug. 23, 1945.]

(iii) Material for a construction project where the total cost of material is more than \$25,000 or the cost of material obtained under this order is more than \$2,500.

(2) An operator is authorized to use the CMP allotment symbol U-9 and is assigned the preference rating AA-3 for deliveries of:

- (i) Telephone sets;
- (ii) Material for a construction project where the total cost of material is not more than \$25,000 and the cost of material obtained under this order is more than \$2,500.

(3) [Deleted Aug. 23, 1945.]

(4) An operator may apply and a supplier may extend the CMP allotment symbol or ratings in the manner provided in Priorities Regulation 3 and CMP Regulation 3, by placing on his delivery order substantially the certification set forth below in paragraph (b) (5).

(5) Utilities maintenance, repair and operating supplies certification.

CMP allotment symbol U-9, preference rating —. The undersigned operator certifies, subject to the penalties of section 35A of the United States Criminal Code, to the seller and to the War Production Board, that, to the best of his knowledge and belief, the undersigned is authorized under applicable War Production Board regulations or orders and under all provisions of Utilities Orders U-2 and U-3, to place this delivery order, to receive the item(s) ordered for the purpose for which ordered and to use any CMP allotment symbol or rating which the undersigned has placed on this order.

(c) *Use of material obtained under this order.* (1) [Deleted Aug. 23, 1945.]

(2) Material costing not more than \$50 obtained under this order on AA-1 rating or U-9 allotment symbol, may be used on any construction project permitted under this order, or authorized on Form WPB-2774 or alternative form, even though the project has been assigned a lower rating or different symbol or is unrated.

(3) Material obtained under this order which is in inventory may be used on any permitted construction project, even though the project is assigned a different allotment symbol or a lower rating either by this order or by the War Production Board on Form WPB-2774, or any alternative form. However, material so used may only be replaced in inventory by use of the different allotment symbol or the lower preference rating authorized by this order or by the War Production Board on Form WPB-2774 or alternative form.

(4) An operator, who does not furnish telephone service to the public, whose "operator's inventory" at the end of 1942 or whose use of material during 1942

did not exceed \$10,000 may not, in any single case, use material obtained under this order costing more than \$500 for operating supplies.

(5) No operator shall subdivide a single order, job, or project to qualify it under the dollar limitations of this Order U-3.

(6) Material obtained under this order may be used for maintenance and repair, without regard to dollar limitations on the use of material for operating supplies.

(7) The dollar limits of this order shall not prevent the use of material on hand to meet temporary traffic or emergency requirements, but where the dollar limits are exceeded the material must be returned to inventory or to its original location in plant within thirty days, unless application has been made to the War Production Board for authority to continue the use of material.

(8) The preference ratings and allotment symbol assigned by this Order U-3 are ineffective with respect to materials scheduled for delivery after September 30, 1945.

(d) [Deleted Aug. 23, 1945.]

(e) *Restrictions on inventory.* (1) No operator shall accept deliveries of material unless after the delivery his operator's inventory will not exceed a practical working minimum. A practical working minimum shall in no case be greater than 27½% of the dollar value of material used during the calendar year 1940 for all purposes exclusive of the items in paragraph (a) (5) (iii) and materials which were used for building construction. The items in (a) (5) (iii) may be accepted by an operator even if his operator's inventory exceeds 27½% of his 1940 usage of material.

(2) No operator shall accept delivery of a size, type, gauge and length of cable, wire or strand, if the operator's inventory of that size, type, gauge and length is in excess of requirements for the next ninety days. However, if an operator needs some wire, cable or strand, this provision does not forbid purchase of the minimum standard reel-length, even though the operator does not expect to use the whole reel in the next ninety days.

(f) *Exemptions.* Any operator whose operator's inventory did not exceed \$25,000 at the end of 1942 is exempt from the inventory restrictions of paragraph (e) (1).

(g) *Sales of material.* Material sold between operators must be sold without a preference rating or CMP allotment symbol.

(h) *Records and reports.* Each operator acquiring maintenance, repair or operating supplies pursuant to this regulation shall keep and preserve, for a period of not less than two years, accurate and complete records of all such supplies so acquired which shall, upon request be submitted to audit and inspection by duly authorized representatives of the War Production Board. In addition, each operator affected by this order shall file such reports with the Communications Division, Office of War Util-

ities, as may from time to time be required by the War Production Board.

(i) *Applicability of regulations.* (1) This order and all transactions affected by it, except as expressly provided, are subject to all applicable regulations of the War Production Board, as amended from time to time.

(2) None of the provisions of CMP Regulations No. 5 or 5A shall apply to operators as defined in paragraph (a) (1) of this order, and no such operator shall obtain any material under the provisions of these regulations.

(j) *Violations.* Any person who willfully violates any provision of this order or who, in connection with this order, willfully conceals a material fact, or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control, and may be deprived of priorities assistance.

(k) *Communications.* All reports to be filed, appeals and other communications concerning this order should be addressed to: Communications Division, Office of War Utilities, War Production Board, Washington 25, D. C. Ref.: U-3.

(l) *Termination date of the order.* This order U-3 expires on September 30, 1945.

Issued this 23d day of August 1945.

(c) Use of material obtained under this order. (1) [Deleted Aug. 23, 1945.]

(2) Material costing not more than \$50 obtained under this order on the U-9 allotment symbol or AA-1 rating, may be used on any construction project permitted under this order, or authorized on Form WPB-2774 or any alternative form, even though the project has been assigned a different symbol, a lower rating or is unrated.

However, if an operator needs some wire, cable or strand, this provision does not forbid him to accept the minimum standard reel-length, even though the operator does not expect to use the whole reel in the next ninety days. Nor does this provision forbid him to accept ocean cable approved under paragraph (f) below.

(f) *Restrictions on purchases.* No operator shall use the allotment number assigned by this order to obtain ocean cable. An operator who needs ocean cable should apply to the Office of War Utilities on Form WPB-2774.

A statement of the considerations involved in the issuance of this amendment has been issued simultaneously herewith and filed with the Division of the Federal Register.

Section 2 (b) of Maximum Price Regulation No. 364 is amended to read as follows:

(b) *Branch warehouse sales.* Where the processor receives frozen fish or seafood in carload lots at a warehouse remote from the original freezer and sells and delivers such frozen fish or seafood in less-than-carload lots from the stock of such warehouse, his maximum price f. o. b. shipping point nearest warehouse for such sales to wholesalers, government agencies, retailer-owned cooperatives or chain store warehouses is the applicable listed base price in section 13, with any appropriate adjustment for kind of package as provided in section 12, plus any transportation cost allowable under section 4, plus a mark-up of 12 percent applied to the sum of the foregoing.

However, the price established by this paragraph (b) may be charged by such processor only if:

(1) The branch warehouse is remote from the processor's principal place of business (which is not a public freezer), at which he unloads and warehouses fish and keeps two or more fulltime employees for the purpose of handling or packing fish and seafood exclusively for him, and from the stock of which he distributes and sells fish and seafood to wholesalers, retailers and purveyors of meals;

(2) The processor maintains at the branch warehouse, or in its vicinity where such warehouse is a public freezer, a plant for the distribution of fish, at which plant he unloads and warehouses fish and keeps two or more fulltime employees for the purpose of handling or packing fish and seafood exclusively for him; and

(3) The processor sells out of the stock of such plant and warehouse to retailers (other than chain store warehouses) whose sales are covered by Revised Maximum Price Regulation No. 507, and

No. 167—3

to purveyors of meals at least 20 percent of the fish or seafood he sells and distributes from such plant and warehouse.

This amendment shall become effective August 27, 1945.

If the establishment does not have a ration bank account, the transferor is to give to the transferee, the "stamps," "tokens," and certificates, he has and to endorse and give to the transferee any ration checks he has. (If the transferee is required to have a ration bank account, he must deposit all the points in that account.

1. There is added a new paragraph (k) to § 8306.1 to read as follows:

(k) "Special tooling" means plant equipment of such special design that it has apparent value only as scrap except in the manufacture of the particular product which such equipment was specifically designed to produce; it includes only jigs, dies, fixtures, gauges, moulds and similar equipment.

2. The last sentence of the first paragraph of § 8306.2 is amended to read as follows: "Except as otherwise provided in §§ 8306.4 and 8306.7, it authorizes the disposal of such equipment only to the contractor in possession for immediate or eventual use in his civilian production."

3. There is added a new paragraph to § 8306.4 to read as follows:

In any case in which the owning agency shall make a written finding that given special tooling will have no reasonably foreseeable use for civilian production, it may dispose of such tooling hereunder to the contractor in possession at scrap prices. In any such case the contractor shall agree in writing that upon the conclusion of his war production, he will offer such tooling to the owning agency for a period of thirty (30) days at the then scrap price of such tooling and, if the owning agency does not wish to purchase such tooling, he will dispose of it as scrap.

4. Section 8306.7 is amended to read as follows:

§ 8306.7 Plant equipment in possession of subcontractors and sublessees. In any case where plant equipment is, in accordance with the terms of a facilities contract, located in the plant of a subcontractor or sublessee, such subcontractor or sublessee shall for the purpose hereof be considered as the contractor in

possession, and owning agencies shall take all steps possible to sell such plant equipment to the sublessee or subcontractor, at his request, on terms and conditions as provided herein. In the case of special tooling, if such subcontractor or sublessee shall state that he does not desire to acquire the property, it may be disposed of by competitive bidding through sealed bids or at auction at the discretion of the owning agencies and under rules and regulations prescribed by the owning agencies. Such rules and regulations shall contain, among other provisions, the following requirements:

(a) The determination of lots shall be subject to approval by the owning agency.

(b) The owning agency shall set an upset price on each lot at which figure the bidding on each lot shall be started.

(c) The right shall be reserved by the owning agency to reject all bids.

(d) Notice shall be given by publication to all possibly interested purchasers indicating the special tooling that will be available for sale, naming a date not less than fourteen (14) days from the time of first publication when the bidding will be closed or when the auction will be held, and giving the upset price on each lot.

(e) If no acceptable bid to purchase is received, the contractor holding the covering facilities contract may be permitted to retain the property under a negotiated sale or under a lease for a period of not more than one year. Sale prices and rentals shall be determined on a basis that is fair and reasonable taking into consideration the limited sale value of the property, its special value to the purchaser or lessee, upset prices and any bids received.

The owning agency may request the advice and assistance of the Reconstruction Finance Corporation in setting upset prices and in determining acceptable sale prices and rentals. At the discretion of the owning agency, auctions, sales or leases authorized hereunder may be combined with auctions, sales or leases authorized under Special Order 17.

This amendment shall become effective August 17, 1945.

DISPOSAL OF SPECIAL TOOLING IN GOVERNMENT-OWNED AIRCRAFT PLANTS

Pursuant to the authority of the Surplus Property Act of 1944 (58 Stat. 765, 50 U.S.C. App. Sup. 1611), it is hereby ordered that:

1. Definitions—(a) Terms defined in act. Terms not defined in paragraph (b) of this section which are defined in the Surplus Property Act of 1944 shall in this order be given the meaning assigned to them in that act.

(b) *Other terms.* (1) "Contract" includes subcontracts and subleases and "contractor" includes subcontractors and sublessees.

(2) "Facilities contract" means a lease, rental agreement or other contract or contract provision, specifically governing the acquisition, use, or disposition of Government-owned machinery, tools, building installations, or other property furnished to or acquired by a war contractor for any war production purpose except incorporation in end products.

(3) "Scrap" means property that has no reasonable prospect of sale except for its basic material content.

(4) "Special tooling" means equipment of such special design that it has apparent value only as scrap except in the manufacture of the particular product which such equipment was specifically designed to produce; it includes only jigs, dies, fixtures, gauges, moulds, and similar equipment and as used in this order is limited to such equipment in aircraft plants.

2. *Scope.* This order is issued under the authority of section 14 (a) of the act relating to contractor inventory. It applies only to Government-owned special tooling that is located in Government-owned aircraft plants which are being operated by private contractors pursuant to facilities contracts.

3. *Owning agencies empowered to authorize retentions or disposals of special tooling.* The Board hereby empowers each owning agency to authorize any contractor with such agency or subcontractor thereunder that is in possession of any special tooling to retain or sell such property as provided in this order. Retentions or sales may be made hereunder at any time before the owning agency takes possession of special tooling or declares such tooling surplus. Nothing herein affects the authority of owning agencies to sell small lots, scrap or salvage in accordance with other regulations or orders of the Board.

4. *Sales procedures.* All disposals hereunder shall be made on the basis of competitive bidding through sealed bids or at auction at the discretion of the owning agencies and under rules and regulations prescribed by the owning agencies. Such rules and regulations shall contain, among other provisions, the following requirements:

(b) The owning agency shall set an upset price on each lot at which figure the bidding on each lot shall be started.

(c) The right shall be reserved by the owning agency to reject all bids.

(d) Notice shall be given by publication to all possibly interested purchasers indicating the special tooling that will be available for sale, naming a date not less than fourteen (14) days from the time of first publication when the bidding will be closed or when the auction will be held, and giving the upset price on each lot.

(e) If no acceptable bid to purchase is received, the contractor in possession may be permitted to retain the property under a negotiated sale or under a lease for a period of not more than one year.

Sale prices and rentals shall be determined on a basis that is fair and reasonable taking into consideration the limited sale value of the property, its special value to the purchaser or lessee, upset prices and any bids received.

The owning agency may request the advice and assistance of the Reconstruction Finance Corporation in setting upset prices and in determining acceptable sale prices and rentals. At the discretion of the owning agency, auctions, sales, or leases authorized hereunder may be combined with auctions, sales or leases authorized under § 8306.7 of Regulation No. 6.

This order shall become effective immediately.

TITLE 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

PART 5—EXPERIMENTAL RADIO SERVICES

GENERAL MOBILE RADIO SERVICES

The Commission, in meeting on August 14, 1945, adopted the following statement of policy in regard to granting authorizations permitting experimental operation in the proposed General Mobile Radio Service:

At the Commission's recent allocation hearings in Docket proceeding 6651, a number of requests were made for the allocation of frequencies for the general purpose of providing two-way radio communications with mobile units of various types. This proposed new radio service was designated as the General Mobile Radio Service and was intended to provide communication facilities both for vehicles operating within metropolitan areas and for vehicles operating primarily on intercity highways. These two classes of service were designated as "Urban Mobile" and "General Highway Mobile" radio service, respectively; 24 channels were allocated for the Urban Mobile Service in the 152-162 megacycle region and 40 channels for the General Highway Mobile Service in the 30-40 and 42-44 megacycle region.

Various suggestions were made at the allocation hearing regarding the best method of use of the limited number of frequencies that have been made available for this general mobile radio service. Representatives of the telephone industry urged that the service be rendered by communications common carriers. Representatives of transportation industries—bus, truck and taxicab—urged the allocation of varying numbers of frequencies for the private use of their respective industries. There was also a suggestion that certain of the transportation industries might coordinate their communication needs in a single system in the interest of conserving frequencies.

The establishment of the new service on a regular basis thus raises important questions of policy which are being studied by the Commission and with respect to which the Commission has as yet reached no conclusions. The Committee believes it desirable, therefore, to obtain through experimentation complete factual data which will assist in the determination of sound policies. However, frequency limitations will necessarily limit the amount of experimental operation which can be permitted in the proposed service. Accordingly, the Commission announces that it will grant a limited number of authorizations permitting experimental operation in the proposed General Mobile Radio Service upon the basis of a determination, upon each application, as to whether bona fide experimentation is contemplated.

Grants will be made for experimental operations only where it is clear that the facilities are to be used to obtain factual data relative to the needs and requirements of the proposed service, and to collect information which might be useful in deciding what method of operation would best serve the public. When sufficient data has been compiled, the Commission proposes to hold a public hearing before issuing any regulations governing the rendition of this service on a regular basis.

It was emphasized that the grant of experimental authorizations will not, in any way, constitute any assurance that the licensee will be authorized to operate stations in the new service finally to be established. The Commission, having arrived at no conclusions regarding the most desirable method of use of the frequencies allocated for the General Mobile Radio Service, cautions all applicants that investment or expenditures undertaken on account of such experimental operation are incurred at the risk that frequencies will not necessarily be made available for the type of service urged in any particular experimental application.

It further appearing, that said tariff schedules state increased charges for telegraph communications in interstate and foreign commerce; that the rights and interests of the public may be injuriously affected thereby; and it being the opinion of the Commission that the effective date of such schedules, insofar as they provide for increased charges for telegraph communications from the United States, its territories and possessions, to Spanish Morocco, should be postponed pending hearing and decision on the lawfulness of such increased charges;

It is ordered, That the Commission upon its own motion, without formal pleading, enter upon a hearing concerning the lawfulness of the charges contained in the above-cited tariff schedules, insofar as they relate to telegraph communications from the United States, its territories and possessions, to Spanish Morocco;

It is further ordered, That the operation of the above-cited tariff schedules, insofar as they provide for increased charges for and in connection with telegraph communications from the United States, its territories and possessions, to Spanish Morocco, be suspended; that the use of the charges therein stated be deferred until November 20, 1945, unless otherwise ordered by the Commission; and that during said period of suspension no changes shall be made in such charges or in the charges sought to be altered, unless authorized by special permission of the Commission.

It is further ordered, That an investigation be, and the same is hereby instituted, into the lawfulness of the rates, charges, classifications, regulations, practices, and services of R. C. A. Communications, Inc., the Commercial Cable Company, Mackay Radio and Telegraph Company, All America Cables and Radio, Inc., and The Western Union Telegraph Company, for and in connection with telegraph communication service between the United States, its territories and possessions, on the one hand, and Spanish Morocco, on the other;

It is further ordered, That in the event a decision as to the lawfulness of the charges herein suspended has not been made during the suspension period and said charges have gone into effect, all of the carriers subject to the Commission's jurisdiction participating in the service provided under the tariff provisions herein suspended, shall, until further order of the Commission, each keep accurate account of all amounts charged, collected or received by reason of any increase in charges effected thereby; that each such carrier shall specify in such accounts by whom and in whose behalf such amounts are paid; and each such carrier shall file with this Commission a report, under oath, on or before the 10th day of each calendar month, commencing December 10, 1945 showing the amounts accounted for as aforesaid during the previous calendar month;

It is further ordered, That a copy of this order be filed in the offices of the

Commission with said tariff schedules herein suspended; that all carriers subject to the Commission's jurisdiction which are parties to such tariff schedules be, and they are hereby each made a party respondent to this proceeding; and that copies hereof be served upon each such party respondent;

It is further ordered, That this proceeding be, and the same is hereby assigned for hearing on the 12th day of September, 1945, beginning at 10:00 a. m. at the offices of the Federal Communications Commission in Washington, D. C.
